

PLATED INTARSIA

Plated intarsia allows to reduce the number of yarn feeders and, at the same time, to create bas-reliefs and / or transparencies. In this case it is no longer necessary to worry about the connection stitches between two colour areas as they held together by the yarn that works throughout all the fabric and that is also available for tubular knitted areas.

Machine: STOLL ADF530-24 Ki

Gauge: 7

Techniques: Intarsia, Plating, Tubular Stitches.

Yarn	Count	Composition	Colour	Yarn Mill
Ecopolycot	Nm 4/28	50%PES 50%CO	Big Bubble 464	Belda Llorens
